

Summary of the work of the College of  
Aldermen and Municipal Council of  
the municipality of Flaxweiler  
2017 - 2023

Dear citizens,

On June 11th, 2023, the municipal elections will take place and the mandate of the current municipal council will end. In the last years, we have tackled numerous projects to shape the future of our municipality in the best possible way. Together we have reached many milestones, launched initiatives and completed projects that have had a lasting impact on our collective well-being. We would like to take this opportunity to sincerely thank everyone for their trust over the past 6 years, as many of these projects would not have been possible without our dedicated citizens.

First and foremost, we would also like to say a big thank you to all the staff in the administration and technical services. Not only do they ensure service to the citizens day in and day out and are committed to the implementation of projects in all areas of the municipality, but they also made a huge and very important contribution during the pandemic to maintain public service and ensure that the administration was able to serve the citizens even in times of great difficulty.

The Covid pandemic has touched us all and had a great impact on our daily lives. We are glad that we have returned to some degree of normality, but the crisis had a big impact on the work of the municipality and the council. Many projects were delayed or had to be postponed for a while and the cost of living increased rapidly. Nevertheless, we as a municipal council look back with satisfaction on the work of the last few years.

On the following pages you will find some examples of the work, projects and initiatives we have started or completed. They were not easy years, but nevertheless we tackled problems and found solutions to improve the welfare of the community. In the meantime, many new projects are underway and of course there are still many problems and challenges to overcome. At this point we would like to wish the new municipal council, which will soon assume succession, every success in its mission.

Many great projects and initiatives have also been launched by our commissions in recent years and we are pleased to have had the opportunity to work with such committed people. A big thank you once again to all commissions and our climate team. We look to the future with confidence and hope that citizens will continue to participate in the political, social and civic life of our municipality in the years to come.

The municipal council,

R. BARTHELMY, J. JANS-FUSENIG, E. APEL, J-M. SADLER, M. BAST, G. SIEBENALER, F. ROLLINGER,  
J. SOUSA, G. HEIDERSCHIED

Drinking water reservoir "Sätzen"
